

# THE POWER OF ACTIVEPURE TECHNOLOGY

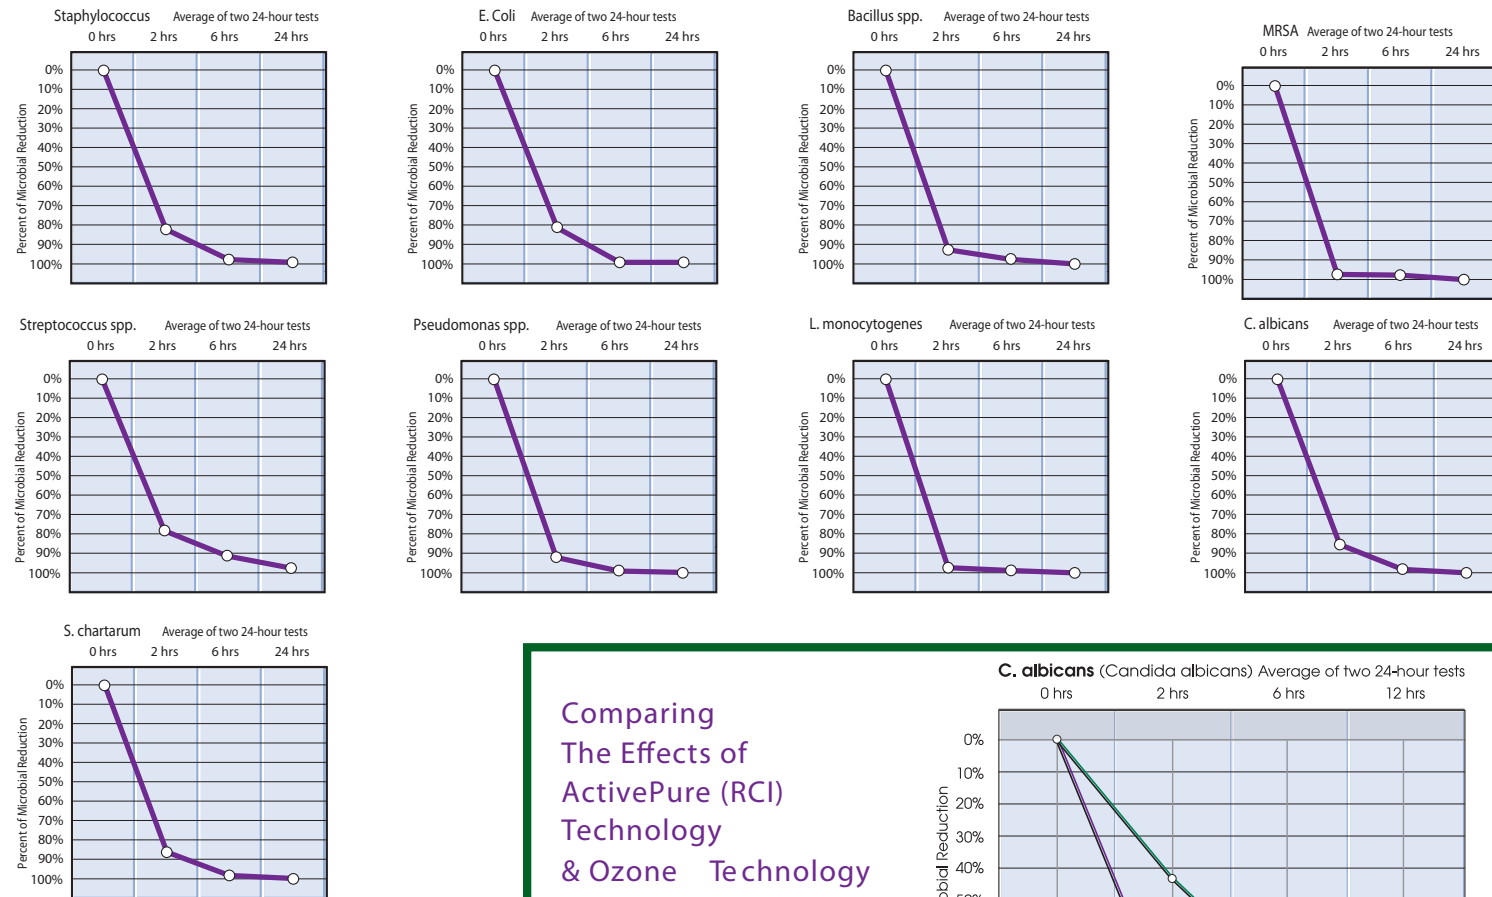

Testing on behalf of activTek Environmental by Dr. James Marsden, at Kansas State University was conducted to determine the effectiveness of ActivePure® (RCI) Technology for the inactivation of Staph (Staphylococcus aureus), MRSA (Antibiotic Resistant Staph), E. coli (Escherichia coli), Bacillus spp., Streptococcus spp., Pseudomonas aeruginosa, Listeria monocytogenes, Candida albicans, and black mold on stainless steel surfaces at diverse contact times in a controlled airflow cabinet. Further testing was conducted for activTek Environmental at the University of Cincinnati Center for Health-Related Aerosol Studies to investigate the novel air purification technique combining aerosol/bioaerosol control mechanisms of unipolar ion emission and photocatalytic oxidation promoted by the ActivePure® (RCI) technique.

ActivePure® Technology is based on a variation of technology originally developed for use in the International Space Station and is recognized as the exclusive Certified Space Technology by the Space Foundation in its category.

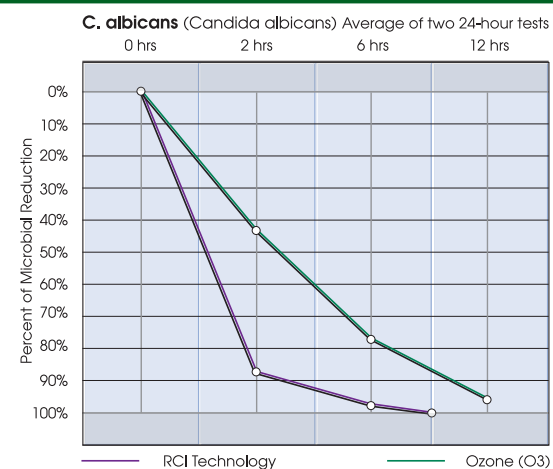

ActivePure Technology has been studied in controlled university testing for reduction of particulate in the air and contaminants on surfaces. Help protect your home and family against dust, allergens, mildew, smoke, odors, and odor-causing bacteria easily and conveniently with ActivePure environmentally active technology.

These results have not been evaluated by the FDA. ActivePure-based products are not medical devices intended to diagnose, treat, or cure any disease. Results may vary.

## Quality of Life Home Improvement Questionnaire

	Always	Sometimes	Never
Does anyone in your family suffer from allergy symptoms?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Do you ever smell pet odors in your home?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Do you ever smell cooking odors or musty smells in your home?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Would you like to reduce dust or pet dander in your home?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Do you have cigarette smokers or smoke odors in your home?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Would you like to reduce approximately 90% of airborne contaminants?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Is there anyone in your house that can't afford to get sick?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Would you like to reduce up to 99.9% of harmful contaminants on surfaces such as kitchen counter tops and bathrooms?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

### IF YOU ANSWERED:

**ALWAYS** or **SOMETIMES** to one or any of these questions. Installing the Air Scrubber PLUS in your home could dramatically improve your quality of life.

# Family

## Quick Facts:

- 1 Designed to help reduce Indoor Air Quality risks know as Sick Building Syndrome.
- 2 Attaches seamlessly to your heating and cooling units' duct work.
- 3 Uses specialized germicidal UV light waves along with a proprietary catalytic process to keep your home clean 24/7.
- 4 Requires only 19 watts of electricity so you won't see an increase in electrical bills.
- 5 Complies with all federal EPA regulations.

Picture of a dirty Heating & Air Conditioning System that needs cleaning.

## The Proven Technology of

# air scrubber PLUS<sup>®</sup>

WITH FRIENDLY CLEANER TECHNOLOGY<sup>®</sup>

### Environmentally Green & Made in the USA

You won't have to worry about your electricity bills going up. The Air Scrubber PLUS uses only 19 watts of electricity, that's less than one third of a standard 60-watt light bulb, and complies with all federal EPA regulations.

### Endorsed by the Space Foundation

ActivePure<sup>®</sup> Technology is based on a variation of the technology originally developed for use in the International Space Station and is recognized as the exclusive Certified Space Technology by the Space Foundation in its category.

### Don't feel helpless.

Do you worry about what is being brought into your home? Contaminants from school, daycare or the office follow us home on hands, clothes and shoes and land on our doorknobs, countertops and floors.

No longer do you need to feel helpless, Air Scrubber PLUS contains ActivePure Technology, proven to destroy up to 99.9% of all surface contaminants! Help scrub, purify & clean the air you breathe by reducing approximately 90% of airborne contaminants.

### Reduce lingering odors.

Whether a burnt dinner, a family member that smokes or a pet that's just come in from the rain, there's not much you can do about some of life's odors, so instead of canceling some of life's best moments, cancel the smell they leave behind.

Working through your heating and air conditioning units, the Air Scrubber PLUS is a unique photocatalytic device that will reduce dust, pet dander and odors in your home. You will be able to reduce common smells such as pet odor, cigarette smoke, paint fumes, mold smells and of course the occasional burnt food odor.

### Reduce sleepless nights.

Lack of sleep, sneezing, itchy, watery eyes... its allergy season. Dust, mold, pollen or many of the other pollutants that can cause irritation and allergies symptoms. These contaminants can be reduced with the Air Scrubber PLUS.

ActivePure Technology uses specialized germicidal UV light waves along with a proprietary catalytic process that creates environmentally friendly molecules of Oxygen and Hydrogen, will help purify your air and reduce irritating particles that can irritate allergy symptoms.

The AirScrubber Plus<sup>®</sup> is designed to help eliminate indoor air quality risks by reducing air pollutants, VOC's (chemical odors), smoke, mold, odor-causing bacteria and odors caused by pets & cooking. The AirScrubber Plus features ActivePure Technology which purifies the air using specialized germicidal UV light waves along with a proprietary catalytic process that creates environmentally friendly molecules of oxygen and hydrogen, just like nature's outdoor scrubbers. These scrubbers work 24/7 in your living environment, continuously reducing airborne and surface contaminants, dust and odors. Germicidal UV light rays have been used for decades by the medical industry as a method for cleaning the air. However, it is only effective in reducing the airborne contaminants that pass directly through the light rays and does not remove odors. AirScrubber Plus with ActivePure Technology actively sends scrubbers into the environment to reduce contaminants on surfaces as well as airborne pollutants. In addition to removing airborne contaminants, ActivePure Technology is also effective on gases, vapors, VOC's and odors.
